1. This tank is very similar to the Soviet T-34-85 tank, with slight modification to the turret, which appears to be rather rounded-out, and to the cannon, which is equipped with a muzzle brake.
2. In particular, the following points are noted:
 - a. Mounting is done at the military workshop at Mladenovac.
 - b. The machine gun on the turret is for anti-aircraft purposes.
 - c. The armor plate located in the front part of the hull, beneath the head lights, consists of spare links for the track.
 - d. The two cylinders at the sides of the tank are spare gas tanks which can be detached when empty.
